# Caroline County Public Works Division

## Recycling information

Caroline County uses 2-stream recycling in which cans, plastics and glass are commingled in the same container and paper and cardboard are similarly commingled in another container. These recyclables are collected and shipped to a recycling facility where the recyclable materials are sorted and shipped to manufacturing facilities. Other recyclable materials are collected in separate waste streams and shipped to manufacturing facilities. Tires are used in a waste-to energy facility that supplies electricity for the operation of a Wastewater Treatment Plant.

In addition Caroline County recycles all office paper that is generated in the operation of the county.

## Caroline County Recycled Materials

- Aluminum and metal cans
- Glass – all colors
- Plastic – all colors
- Paper/newsprint
- Cardboard
- Appliances (white goods)
- Lead automotive batteries
- Used motor oil
